Located in the heart of downtown Vancouver’s waterfront, Canada Place is a multi-use, world-class facility that provides Canadian experiences, from interactive and educational elements to national celebrations.

As part of a Canada themed installation for the West Promenade at Canada Place, PWL developed a paving pattern using recycled coloured glass tiles with town names from each province in Canada. The challenge was to employ the aesthetic of glass tiles in a heavy pedestrian traffic area that could withstand damage, yet project vibrancy and colour as a unique and engaging ground plane material.

**Location**
Vancouver, British Columbia

**Date**
2009-2012

**Owner + Client**
Canada Place Corporation / Musson Cattell Mackey Partnership
